RULES FOR FORETELLING THE WEATHER ACCORDING TO THE RISE AND FALL OF THE BAROMETER.

THE BAROMETER RISES

For Southerly Wind (including from South-west by the South to the Eastward).

For Dry or Less Wet Weather (if Very Wet Weather has been prevalent) for less wind, or for more than one of these changes, *except* on a few occasions when Rain comes from the Southward with strong wind.

THE BAROMETER FALLS

For Northerly Wind (including from North-east by the North to the Westward).

For Wet Weather in Winter, for strong wind in Summer, or for more than one of these changes. *Except* on a few occasions when moderate wind with rain comes from the Southward.

The Chinese Civil year is Lunar, consisting of 12 months of 29 days and 30 days alternately. Every three years a thirteenth month has to be added, or rather, in every nineteen years there are seven years which have thirteen months. Even this contains some error; they have therefore formed a cycle of 60 years, in which period 22 intercalary months occur.

The Japanese year is divided into twelve months, distinguished by the twelve signs of the zodiac, which are named after twelve animals; these twelve months vary in length year by year, and the Mikado or Sacred Emperor arranges the number of the intercalary days and the months to which they are to be added.

JANUARY corresponds to July in Great Britain. It is usually one of the hottest months in the year, and is marked by frequent thunderstorms. In January, 1878, the weather was warmer than usual during the month; the mean shade temperature, 79.0, being 0.8 over the average of the month for the previous ten years, but equal to the average of the previous three years. The highest reading in shade, 104.0, was on the 16th; the lowest on grass, 60.0, was on the morning of the 9th. The mean barometric reading, 29.978 inches was 0.072 inches above the average of the month; the highest, 30.144 was at 9 p.m. on the 7th, and the lowest, 29.704, at 3 p.m. on the 16th. Rain fell on 11 days; the total fall, 5.72 inches, being 1.38 inches under the average of the month for the previous ten years; the maximum fall during 24 hours, 1.72 inches, was on the 3rd. The total rainfall of the month was 5.72 inches on 11 days.

FARM AND GARDEN, AND MAIL CALENDAR FOR JANUARY.

The following gardening directions are more especially for the Southern and Coast Districts; In the Northern portions of the colony sowing should take place earlier than the times here given.

GARDEN.—Small quantities of the following seeds may be sown if possible just before rain: Cabbage, cauliflower, Brussels sprouts, turnips, spinach, celery, French beans, and green peas, also of cucumbers and melons, for late crops. Attend to the grapes as they ripen. The foliage of those wanted to hang till dead ripe should be arranged so as to shield the grapes from the rays of the sun. The Isabella may still be cut for late crop. Strong shoots of favorite grapes may be bent down and layered; in this way better rooted plants may be obtained than cuttings can produce, and a season saved. Peach trees should now be allowed, and encouraged, to make a sufficiency of wood for next season's crop. Attend to the pinching and shortening of young shoots on apple and pear trees. Stone-fruited trees may now be budded. Intending cultivators of celery, cauliflowers, cabbages, &c., should get together as much dung as possible the quality of which will be much improved by frequent turning, and shelter from heat and rain. The

more hardy annuals may be sown. Dahlias, Chrysanthemums, and other tall flowering plants should be tied up and staked.

FIELD.—Sow maize for late crop. Sow patches of oats or barley for cutting green. Break up and prepare land for potatoes, lucerne, &c. In breaking up land, it is better to leave the surface rough and open to the action of the sun's rays, which are the best pulverent. A rough surface also retards the growth of weeds. Arrowroot is now making its growth, and ought to be kept clean to allow the free circulation of air.

FEBRUARY corresponds to August in Great Britain; the weather is generally excessively hot and sultry with a humid atmosphere. In February 1878 the weather was warmer than usual during the month; the mean shade temperature, 78.3, being 1.0 over the average of the month for the previous ten years, and 1.5 over the previous three years. The highest reading in shade, 97.0, was on the 24th; the lowest on grass 62.0, was on the morning of the 1st. The mean barometric reading, 30.009 inches, was 0.114 inches above the average of the month; the highest 30.199 inches, was at 9 p.m. on the 25th, and the lowest, 29.852 inches, was at 3 p.m. on the 19th. Rain fell on 17 days; the total fall, 17.53 inches, being 10.49 inches over the average of the previous ten years. The greatest fall in 24 hours, 3.15 inches, was on the 20th. The total rainfall of the year 1878, up to 28th February, was 23.25 inches, on 28 days.

FARM, GARDEN, AND MAIL CALENDAR FOR FEBRUARY.

GARDEN.—Take advantage of moist and dull weather for sowing early crop—small quantities of vegetable and salad seeds. To guard against failure from scorching; cabbage, cauliflower, and celery seed beds should be protected by a shading of calico or sacking; a few boughs laid on saplings supported on forked sticks make a good rough artificial shading. See to have some well-rotted dung prepared for celery trenches. Budding, should be finished this month. In the flower garden, remove decayed foliage to the manure heap, and save valuable seeds as they ripen. Keep borders, beds, and walks free from weeds. Watering should be regularly attended to and the roots of all plants kept well covered and moist.

FIELD.—In sheltered situations along the seaboard, maize may be planted during the first two weeks of the month. Hill maize of former plantings; early hilling tends to keep down suckers. Continue the preparation of land for wheat, lucerne, and potatoes, and commence planting the latter, changing the seed if disease of any kind has shown itself. Usually fresh seeds of all kinds are best procured from localities having a different climate to that where they are intended to be grown.

DISTANCE AT WHICH VEGETABLES SHOULD BE PLANTED.—Whether seedlings are hoed out to thin

them, or planted out to grow, the distances should be attended to. For instance, onions should be four to six inches apart; turnips, carrots, and winter spinach, six to eight inches; parsnips and beet-root, nine inches. In planting out, lettuce should be a foot apart, cabbage eighteen inches; cauliflower and large broccoli, twenty-four inches; dwarf potatoes, nine inches in the row, and eighteen from row to row; tall potatoes, twelve inches in the row, and twenty-four from row to row; dwarf peas, rows two to three feet apart; tall peas, five to six feet; broad beans, two feet; French beans, two feet; scarlet runners, six feet; summer spinach, four inches in a row, a foot from row to row, if broadcast, six inches; asparagus, twelve inches.

MARCH corresponds to September in Great Britain, and begins to show a pleasant decrease in temperature. In March, 1878, the weather was much warmer than usual; the mean shade temperature, 77.5, being 2.6 over the average of the month for the previous ten years, and 1.9 over the previous three years. The highest reading in shade, 93.0, was on the 28th; the lowest on grass, 62.0, was on the morning of the 21st. The mean shade temperature of the month was the highest on record. The mean barometric readings have been above the average of the month; the highest, 30.298 inches, was at 9 a.m. on the 25th, and the lowest, 29.852 inches, at 3 p.m. on the 27th. Rain fell on 19 days; the total fall, 3.88 inches, being 4.26 inches under the average of the month for ten years, and 0.52 inches under the previous three years. The greatest fall in 24 hours 1.09 inches, was on the 24th. The total amount of rain that fell in the year 1878, up to 31st March was 27.13 inches, on 47 days.

FARM AND GARDEN, AND MAIL CALENDAR FOR MARCH.

GARDEN.—The scorching heat of the Queensland summer is now over, and this is the best time to enter thoroughly into the cultivation of European vegetables. Sow for full crops of cabbages, Savoy, cauliflowers, Brussels sprouts, couve tronchuda, turnips, carrots, onions, leeks, beans, peas, beets, parsnips, parsley, salad, &c. It is a good plan to prick young cauliflowers into a bed of nice rich earth, placing them about four inches apart; they occupy little room, and can be easily watered and shaded for a few days. Couve tronchuda, or Baganza cabbage is of considerable value; the main rib of the outside leaves resembles the sea-kale when well boiled, but the heart is the best; it ought to get as much room as cauliflower. Cauliflowers yield a fair return when properly cultivated, but broccoli ought to be avoided, as it is not suited to the climate, and does not expand its flower. When the blight or aphids affects the young plants they should be watered with soap suds made from soft-soap. Many place a coop of chickens in the garden,

they effectually clear off the insects, but are prone to eat the young plants as well. Broad beans also frequently fail to pod, or do not pod till the spring; every bee keeper however ought to sow a quart or two, as they afford a rich pasturage to the bee at a time of the year when flowers are scarce, the same may be said of mignonette. In the flower garden fill up vacancies caused by the removal of dahlias, &c., by sowing a selection of hardy annuals.

FIELD.—This is the best month for planting potatoes, and the planting should be finished by the end of the month. Sow mangold wurtzel.

APRIL corresponds to October in Great Britain; cool weather is now setting in, and nights are frequently chilly. In April 1878 the weather was very much warmer than usual during the month; the mean shade temperature, 74.5, being 3.8 over the average of this month for the previous ten years, and 3.4 over the previous three years. The highest reading in shade, 99.5, was on the 23rd; the lowest on grass, 58.0, was on the morning of the 12th. The highest barometric reading, 30.344, was at 9 a.m. on the 17th, and the lowest 29.798, at 3 p.m. on the 29th. The mean barometric reading, 30.114, was 0.51 inches above the average of the month for the previous ten years. Rain fell on 7 days; the total fall, 0.72 inches, being 3.47 inches under the average of the month for the previous ten years, and 2.22 inches under the previous three years. The greatest fall in 24 hours, 0.28 inches, was on the 4th. The total amount of rain which fell in the year 1878, up to April 30th, was 27.85 inches on 54 days.

FARM AND GARDEN AND MAIL CALENDAR FOR APRIL.

GARDEN.—Attend to those vegetables which were sown last month; beans and peas should be kept clean; cabbages and cauliflowers, when fit to handle, should be transplanted; turnips and carrots should be thinned. Sow some of the more suitable vegetables and salads for succession; but the cottage gardener will find little satisfaction from cauliflowers, Savoys, or Brussels Sprouts, if sown late this month—his principal dependence for greens should be on the cabbage. Earth up celery if the weather is dry, not otherwise. Bananas during this and the next month are apt to break down; heavy branches should be propped. In the flower garden, all alterations and additions should be made; as evergreen shrubs, roses, &c., bear moving well now. In planting out or removing trees and shrubs a good spadeful of well rotted manure should be dug into the soil and thoroughly mixed with it for about an eighteen inch circle. Make a hole large enough to allow of the roots being spread out. Place the plant in the hole, having lopped off all damaged portions of the root, fill in the hole raising the plant two or three times to let the earth get underneath and between the roots, then tread the

earth down firmly. Drive a stake into the ground to which fasten the stem to prevent its swaying. This is also a good time to transplant bulbs. Make a sowing of hardy annuals for spring decorations.

FIELD.—Prepare land for oatens hay crops, and sow a patch for cutting green. Land intended for lucerne should be cleaned, drained, and deeply cultivated. The rapidity with which summer grass and other weeds cover the surface of the soil during the early months of the year, and the soddening effects of heavy rain, will be an objection to the preparation of land long before seed time; but in the case of lucerne, no pains should be spared in getting a pulverised and mellow bed for the seed. Lucerne may be sown. Mangold wurtzel may still be sown.

MAY corresponds to November in Great Britain. The Queensland winter may now be considered as having begun. Weather generally cool and enjoyable. In May, 1878, the weather was slightly warmer than usual during the month; the mean shade temperature, 65.8, being 0.2 over the average of the month for the previous ten years, and 0.2 under the previous three years. The highest reading in shade, 83.0, was on the 1st; the lowest on grass, 46.0, was on the morning of the 24th. The highest barometric reading, 30.340 inches, was at 9 a.m. on the 6th, and the lowest, 29.775 inches, at 3 p.m. on the 10th. The mean barometric reading, 30.128 inches, was 0.057 inches above the average of the month. Rain fell on 12 days; the total fall, 4.09 inches, being 1.27 inches over the average of the month for the previous ten years, and 2.97 inches under the previous three years. The greatest fall in 24 hours, 2.36 inches, was on the 8th. The total amount of rain which fell in the year 1878, up to 31st May, was 31.94 inches, on 66 days.

FARM AND GARDEN AND MAIL CALENDAR FOR MAY.

GARDEN.—Sow cabbages, turnips, carrots, peas, onions, parsley, and culinary herbs—such as sage, marjoram, and thyme, and continue the planting out of cabbage and other plants, choosing a dull day or just before rainfall. Rhubarb may now be planted, taking care that the ground is well manured and deeply trenched. New strawberry beds may be laid out, and should be made where a plentiful supply of water may be ensured. Orange, limes, and all evergreen fruit trees and ornamental shrubs may be planted during this and the two following months, but, when convenient, give this month the preference. A situation sheltered from westerly winds should be selected for azaleas and camellias—which flower during June, July, August, and September—as shelter very much prolongs the life of the flowers.

FIELD.—Sow lucerne:—If this seed were sown in drills, so as to permit of being hoed as farmers do their wheat in England, it would give the young plants a good start, and would much promote the subsequent vigor and performance of the crop; if drilled, five pounds less seed may be given to the acre. As spring

maize, from the general dryness of the season, frequently yields but a poor return, it is better to sow but a small breadth of this crop and in its stead to have oats or hay, the stubble of which, when ploughed in in November and December, will give a full crop of maize. Commence out sowing for hay crop, sowing the poorest soils first. Sow also wheat for grain crop. If any tendency to smut, the seed before sowing should be steeped in water in which blue stone (sulphate of copper) has been dissolved. Attend duly to the hilling of potatoes.

JUNE corresponds to December in Great Britain; weather generally cool, with fine clear nights and sometimes heavy dewfall. In June 1878 the weather was much colder than usual; the mean shade temperature, 58.8 being 2.0 under the average of this month for the previous ten years, and 2.1 under the previous three years. The highest reading in the shade 80.0, was on the 1st; the lowest on grass, 35.0, was on the morning of the 30th. The highest barometric reading, 30.266 inches, was at 9 a.m. on the 26th, and the lowest, 29.762 inches, at 3 p.m. on the 24th. The mean barometric reading, 30.034 inches was 0.184 inches above the average of the last ten years. Rain fell on 2 days; the total fall, 0.37 inches, being 3.48 inches under the average of the month for the last ten years, and 1.05 inches under the last three years. The greatest fall in 24 hours, 0.28 inches, was on the 23rd. The total amount of rain which fell in the year 1878, up to 30th June, was 32.31 inches, on 68 days.

FIELD AND GARDEN AND MAIL CALENDAR FOR JUNE.

GARDEN.—Peaches, mulberries, quinces, apples, pears, &c., may now be transplanted, but young and vigorous growing late peaches and apples, which are yet green, may be left for a week or two. The apple is coming into favour in the southern part of Queensland; a few trees ought to be planted in every garden. The following are twelve sorts which bear well in the neighbourhood of Brisbane:—Nonsuch, Mobbs Royal, Mammoth, Kirke's Golden Pippin, Five Crown Pippin, Greening, Smeating, Kerry Pippin, Golden Harvey, Requette, Blanche d'Espagne, Blenheim Pippin, Silver Russet. Grape vines, may be pruned, unless cuttings are wanted, in which case they had better be left till the middle of next month. If the vines are young, apply the knife fearlessly, cutting down to one or two eyes. Peaches, mulberries, figs, &c., should now be pruned, remembering that thorough pruning gives superior fruit. Bearing trees that have been properly attended to during summer by pinching and breaking off, will not require much pruning, merely cutting in the leading shoots and removing such branches as tend to spoil the

uniform appearance of the tree. Heavy bunches of bananas should have a thin sack drawn over them, to protect them from the frost and the blighting influence of the westerly winds. The bottom of the sack should be open, that the ripening of the fruit may be observed. Sow peas, turnips, onions, cabbages, leeks, parsnips, and beet. In the flower garden, propagate petunias, verbenas, geraniums by cuttings, and herbaceous plants by division.

FIELD.—Continue to sow oats for hay, and the lucerne sowing ought to be finished this month. Make preparations for the manufacture of arrowroot. Wheat and barley may still be sown for late crops.

JULY corresponds to January in Great Britain, and like it, is the coldest month of the year, though the sun has considerable power in the middle of the day. In July, 1878, the weather was warmer than usual during the month, the mean shade temperature, 60.8, being 2.0 over the average of the month for the previous ten years, and 1.3 over the previous three years. The highest reading in shade, 82.0, was on the 3rd; the lowest on grass, 38.0, was on the morning of the 30th. The mean barometric reading, 30.84 inches, was .063 inches below the average of the month; the highest, 30.410, was at 9 p.m. on the 8th, and the lowest, 29.752 inches, at 3 p.m. on the 19th. Rain fell on 4 days; the total fall, 0.24 inches, being 3.71 inches under the average of the month for the previous ten years, and 4.82 inches under the previous three years. The greatest fall in 24 hours, 0.18 inches, was on the 11th. The total amount of rainfall during the year 1878, to 31st July, was 32.25 inches, on 72 days.

FARM AND GARDEN AND MAIL CALENDAR FOR JULY.

GARDEN.—Go on with the pruning of deciduous trees (trees whose leaves fall). Vine pruning ought to be finished, and if an increase of plants is wanted, cuttings ought to be taken from straight, well-ripened wood of last year's growth; they should be about fifteen inches long; three-fourths of their length should go in the ground, and the earth should be well trod round their base. Orange grafting should be commenced. In the flower garden, dig the flower beds, give a dressing of well rotted manure when it is required. Frame roses; and sow such annuals as sweet peas, larkspurs, lupins, zinnias, Phlox Drummondii, calliopsis tinctorius, German stocks. Re-pot fuschias. The following selection of roses will give satisfaction to every one who will take the trouble to cultivate them:—Souvenir de Malmaison, Souvenir d'un ami, Safrano, Gloire de Dijon, Indica alba, Cramoise superieure, Fairy, Princess Adelaide, Prince Albert, Bourbon Queen, Marechal Niel, Géant des Batailles,

Prince Camille de Rohan, Lord Macaulay. In the Kitchen Garden, broad beans and peas may be sown, and lettuce, cauliflowers, and onions transplanted.

FIELD.—The farmer ought to look forward to the planting of potatoes, sweet potatoes, cotton, arrowroot, and oats for hay, and lay his plans and prepare his ground accordingly; the plough should therefore be kept going, and the harrow and roller should follow the plough closely, to prevent evaporation. A few potatoes should be planted, and the manufacture of arrowroot proceeded with.

AUGUST corresponds to February in great Britain, is for the most part cold, but towards the end a rise in the temperature may be noticed. In August 1878 the weather was much warmer than usual during the month, the mean shade temperature, 64.6, being 3.2 over the average of the month for the previous ten years, and 2.1 over the previous three years. The highest reading in shade, 91.0, was on the 12th; the lowest on grass, 40.0, was on the morning of the 8th. The highest barometric reading 30.454 inches, was at 9 a.m. on the 21st, and the lowest, 29.766 inches, at 3 p.m. on the 1st. The mean barometric reading, 30.115 inches was .019 inches lower than the average of the month. Rain fell on 5 days; the total fall, 2.23 inches being 1.40 inches over the average of the month for the previous ten years, and 1.85 inches over the previous three. The greatest fall in 24 hours, 1.55 inches, was on the 21st. The total amount of rain which fell during the year 1878 up to August 31st was 34.78 inches on 77 days.

FARM AND GARDEN AND MAIL CALENDAR FOR AUGUST.

GARDEN.—Orange grafting should be finished the first week of this month, and pears, apples, peaches, grapes, &c., as soon after as possible. The transplanting of trees should be finished during this and the following month, some trees and plants may require watering, and every newly planted tree, if the weather be dry, should be well settled in its place with water and some litter placed over the roots to prevent the ground from baking. In all cases where watering has to be done, as much should be given as will keep the ground moist for a considerable time. The best way to accomplish this, is to make a hole near the plant to be watered, and pour in as much water as will moisten the earth by diffusion for some distance round, without raising the water to within three inches of the surface. When enough has been given, and the water well soaked away, fill the hole. There are some hard-wooded evergreens, such as the camelia, which are rather difficult to establish in the ground during the fierce heat and drought of our

spring month. A day or two before such stock are put out, the place where they are to grow should be thoroughly wetted, and when the ground has recovered sufficiently to work without sticking to the spade, the plants should be put in and well settled in their place with water; a few leafy boughs should also be stuck in to shade them from the mid-day sun. Make a small sowing of cucumbers, melons, and French beans. **FIELD.**—Potato planting should be finished early this month. It is also well to begin the planting of maize, as the sooner it is planted the deeper it will root before the warm weather begins.

SEPTEMBER corresponds to March in Great Britain. In September 1877, the weather was warmer than usual during the month, the mean shade temperature, 67.8, being 0.2 over the average of the month for the previous ten years, and 1.8 over the previous three years. The highest reading in shade, 87.0, was on the 22nd; and the lowest on grass, 43.0, was on the morning of the 24th. The highest barometric reading, 30.394 inches, was at 9 a.m. on the 9th; and the lowest, 29.906 inches, at 3 p.m. on the 20th; the mean barometric reading, 30.189 inches, was .087 inches over the average of the month. Rain fell on 7 days; the total fall, 1.28 inches, being 0.13 inches under the average of the month for the previous ten years; the greatest fall in 24 hours, 0.54 inches, was on the 28th. The total rainfall for the year 1877, up to September 30, was 19.28 inches, on 91 days.

FARM AND GARDEN, AND MAIL CALENDAR FOR SEPTEMBER.

GARDEN.—Pears and Apples may still be grafted. The grape vines will now be pushing, and stakes and trellising, if not already attended to should be got into proper repair at once. Galvanized wire, supported on hardwood posts, makes a durable and cheap trellis. Attend to the vines as they break, and rub off superfluous shoots from the root and breast of the vine, and tie in young fruiting shoots in good time. White Maize (not Tuscorora), if sown occasionally during this and the following months till January, will yield a vegetable, if used green, equal to green peas. Sow hibiscus rosetta, passion fruit, and Cape gooseberry, make full sowing of French beans, cucumbers, rock and water melons, narrows, pumpkins, tomatoes, capsicums. Transplant cabbages on favourable occasions. This is one of the driest periods of the year, and it is consequently a good time for the destruction of weeds. If the walks and flower borders get a thorough cleansing just now, they will not give much trouble for some time. A neat verge or border for the walks greatly enhances the appearance of a garden. Euphorbia Bojeara may be suggested as suitable for this purpose; it is easily propagated by division and cutting, is compact in its habits, and

may easily be kept in trim; it stands the drought well, and is in flower during the greater part of the year. Dahlias will now be pushing, and should be put up. Fuschias, also, will be growing fast, and ought to be carefully tended. If no cuttings were struck last month, it may still be done, selecting short-pointed stiff young wood.

FIELD.—Finish maize planting for spring crop. Grow sorghum for green fodder. Plant arrowroot and sweet potatoes, sow cotton, tobacco, &c. Hill potatoes. Prune cotton; it is better to prune low—about six inches from the surface of the ground.

OCTOBER corresponds to April in Great Britain; weather begins to be unpleasantly hot, with occasional thunder and sometimes heavy hail storms. In October 1877, the weather was slightly warmer than usual during the month, the mean shade temperature, 71·6 being 0·1 over the average of the month for the previous ten years, and equal to the average of the previous three years. The highest reading in shade 94·0, was on the 15th; the lowest on grass, 50·0, was on the morning of the 23rd. The mean barometric reading, 30·106 inches, was 0·053 inches above the average on the month; the highest 30·462 was at 9 a.m. the 23rd, and the lowest, 29·774 inches, at 3 p.m. on the 19th. Rain (which varies much in quantity during this month) fell on 11 days; the total fall, 2·23 inches, being 0·23 inches under the average of the month for the previous ten years; the greatest fall during 24 hours, 0·60 inches, was on the 1st. The total rainfall for the year 1877, to 31st October, was 21·61 inches, on 102 days.

FARM AND GARDEN, AND MAIL CALENDAR FOR OCTOBER.

GARDEN.—Peach trees ought to be well attended to at this season; all young shoots, but more especially the gross ones, should be pruned away. Those who will take this trouble will secure large fruit. The minor enemies of the cultivator will now be manifesting their power. The ground ought to be cleared of the roots of cauliflowers and savoy destroyed by the aphids, but some roots of the cabbage may be left in the ground as they yield a supply of wholesome greens during the summer. The grub may be committing ravages among the potatoes and maize, and the lady-bird among the marrows, cucumbers, and pumpkins; there is no cure for these pests but hand-killing, and it should be done. The vines now require constant care; pinch laterals at their third or fourth leaf, and shoots disposed to ramble should be stopped. In tying in, dispose of foliage so as to shade the fruit. It will be necessary after the middle of this month to keep a sharp look out for that dread scourge of the grape vine, *Oidium Tuckeri*. If the slightest trace of the disease is discovered, sulphur should at once be

applied, either by itself or mixed with any proportion of finely sifted lime up to one half. Sow cucumbers for succession; the vegetables mentioned last month may still be sown. Plant pineapples, bananas, olives, mangoes and other tropical fruit trees. In the flower garden, sow such annuals as balsams, cockscombs, nasturtiums, and amaranths.

FIELD.—If potatoes are not earthed up, do it at once, and do it carefully, on account of the great heat to which they will be subjected before they are ripe. Plant sweet potatoes, sow cotton, transplant tobacco. Cotton pruning should be finished the first week of this month.

NOVEMBER corresponds to May in Great Britain. Summer has now fairly set in, and the heat begins to be oppressive; though the nights on elevated positions are cool and pleasant. In November 1877, the weather was much warmer than usual during the month; the mean shade temperature, 77.8, being 2.8 over the average of this month for the previous ten years, and 0.5, over the previous three years. The highest reading in shade, 94.5, was on the 5th; the lowest on grass, 49.0, was on the morning of the 4th. The mean barometric reading, 30.004 inches was 0.061 inches above the average of the month; the highest, 30.260 was at 9 a.m. on the 1st, and the lowest, 29.638, at 3 p.m. on the 22nd. Rain (which varies much in quantity during this month) fell on 7 days; the total fall, 5.79 inches, being 1.96 inches over the average of the previous ten years; the greatest fall during 24 hours, 2.58 inches, was on the 18th. The total rainfall for the year 1877, up to November 30, was 27.40 inches on 109 days.

FARM AND GARDEN, AND MAIL CALENDAR FOR NOVEMBER.

GARDEN.—Intending planters of pineapples and bananas should now be busy in order that the plants may derive the full benefit of the coming summer. It is time lost to put in the plants in autumn or winter, as they do not start into growth till roused by the heat of the following season. The Isabella, and some other grape vines, will yield a second crop if some of the strong shoots are now cut. In every bud along the cane, the embryo flower for the next season is embedded, and if the shoot is cut while the sap is flowing strong in the vine, one or two of the buds next below the cut will burst, and, in the case of the Isabella, flower and bear fruit. In most other varieties, the flower, not being forward enough, either drops prematurely, or is absorbed into the young shoot. Begin with a few shoots of the Isabella. Attend to the training of grape vine generally, remove suckers and all barren shoots that will not be wanted for next year, pinch laterals and shoots rambling beyond due bounds. The sulphurings of the last month may have only checked the vine disease; if the weather is moist

and warm, great watchfulness will be necessary in order to avert the consequences of a fresh outbreak. In the kitchen garden, cabbages may be planted out before rainfall, and French beans, marrow, and rock melons sown for succession.

FIELD.—Hay-making should be finished, and the stubble ploughed for winter maize; it is better, however, not to put in the maize seed this month, as the crop will be more heavy and regular if planted in December or January. There are often a great many blind or barren stalks in maize planted in November.

DECEMBER corresponds to June in Great Britain. It is a month usually of fierce sunshine and cloudless skies; the nights are sometimes pleasantly cool. In December, 1877, the weather was much warmer than usual during the month; the mean shade temperature, 80.7, being 1.9° over the average of the month for the previous ten years, and 2.5° over the previous three years. The highest reading in shade, 99.5, was on the 19th; the lowest on grass, 60.0, was on the morning of the 13th. The mean barometric reading 29.957 inches, was 0.36 inches above the average of the month; the highest, 30.237 inches, was at 9 a.m. on the 12th, and the lowest, 29.697, at 3 p.m. on the 19th. Rain (which varies much in quantity during this month) fell on 10 days; the total fall, 2.88 inches, being 2.9 inches under the average of the previous ten years; the greatest fall during 24 hours, 0.78 inches, was on the 27th.

The weather was very oppressive during the month, the temperature ranging high throughout, with occasional showers and storms. On the 28th, at 5 p.m., a violent hail and thunder storm visited Brisbane, coming from S. to E., the wind blowing with great force, carrying away verandahs and balconies from exposed positions, while the hailstones, many of them two inches in diameter, and weighing from one to two ounces, driven by the wind, destroyed the glass in all the exposed quarters, and in many cases pierced the galvanized roofing of houses. Although the storm only lasted twenty minutes the damage done to property was considerable.

The total rainfall for the year 1877 was 30.28 inches, on 119 days.

FARM AND GARDEN, AND MAIL CALENDAR FOR DECEMBER.

GARDEN.—It is a difficult matter to keep up a supply of vegetables during the summer months, unless a plentiful supply of water can be got. French beans and marrow are the most certain, and foresight should be used in adapting the sowing to the probable demand. Marrows, however, may be stored, or consumed by poultry and pigs, so it is better to have plenty. Good crops of pumpkins may be gathered from seed sown early this month. Should a day or two of moist dull weather occur, some cauliflower, cabbage, and celery seeds may be sown. Prolong your grape season by extracting a second crop out of the Isabella. If the *Oidium Tuckerii* is not yet subdued, the vines may be syringed with the following mixture, as dry sulphur is unsightly on fruit which may in a

few days have to go to market or appear on table: one pound of sublimed sulphur, one pound of fresh-slacked lime, and one gallon of soft water; these are to be boiled for twenty minutes, and then strained, to this liquor add one gallon more water, and boil for twenty minutes longer. It is then to be allowed to cool, and stored away in a jar. When used, mix one pint with ten gallons of water. Apply with a syringe.

From this Table the time of High Water on any day during 1879 for the Ports mentioned may be found.

RULE.—To or from the time of High Water at Brisbane Bar for the given day (to be found in the Calendar on previous pages) add or subtract the constant (tide interval).

EXAMPLE.—To find high water A.M. and P.M. at Wide Bay on March 1, 1879:—High Water at Brisbane Bar on that day is 2.9 a.m., and 2.33 p.m., subtract the constant for Wide Bay 1.35, and the result is 0.34 a.m., and 0.58 p.m.

THE COLONY OF QUEENSLAND.

THE Colony of Queensland, the youngest of the Australian dependencies—its separate existence dating only from December 10th, 1859—comprises the whole of the North-Eastern portion of the Continent of Australia, its boundaries being on the North the Gulf of Carpentaria, on the East the Pacific Ocean, on the West the Northern Territory of South Australia, the dividing line being the 141st meridian of longitude from the 29th to the 26th parallel, and thence the 138th meridian—and on the South the Colony of New South Wales. Its estimated area according to a corrected return is 669,520 square miles or 428,492,800 square acres, being about twelve times the size of England and Wales. Its extreme length from North to South is 1300 miles, its breadth 800 miles, the coast line being about 2550 miles.

Below will be found some of the principal statistics of the year 1877. Fuller information of the rise, progress, and present condition of the Colony and description of all the principal Towns will be found in the "AUSTRALIAN HANDBOOK."

POPULATION.—The population of Queensland according to the census taken in May, 1876, was 173,283 persons, 105,009 males, and 68,274 females, this is exclusive of the aboriginal population, but inclusive of 10,412 Chinese. On June 30, 1877, the population was estimated at 198,361. On December 31, of the same year it had increased to 203,084—124,924 males, 78,160 females. During the year there were 7,169 births, 3,373 deaths, and 1,477 marriages.

ELECTRIC TELEGRAPH.—On July 1st 1878, 5,100 miles of line with 6,815 miles of wire were in operation, there being 136 stations employing 294 officers. The cash receipts during the year amounted to £33,326 16s. 8d., exclusive of messages on the public service. The year's expenditure amounted to £54,198 8s. 5d.

POSTAL.—There are 210 post offices and 62 money order offices. During the year 1876-77 there were carried 4,096,907 letters, 2,881,915 newspapers, and 261,873 book packets.

EDUCATION.—There were on January 1, 1878, 267 schools in operation, viz:—179 state schools, 66 provisional schools and 22 non-vested schools taught by 372 male and 329 female teachers. The total expenditure during the year 1877, was £90,710 7s. 5d.; the cost of education per head being £2 14s. 8½d.; average attendance 19,455.

IMMIGRATION.—During 1877, 4,834 Immigrants were landed in the Colony, making a total of 97,235 introduced since 1860.

AGRICULTURE.—The extent of land under cultivation, according to the latest published statistics, was 85,569 acres, the principal crops being—Wheat, 5700 acres; maize, 41,705 acres; barley, 688 acres; oats, 162 acres; potatoes, 3928 acres; cotton, 573 acres; sugar-cane, 13,690 acres; arrowroot, 119 acres; tobacco, 59 acres; sown grasses for hay, 4620 acres; vines, 523 acres; gardens and orchards, 2610 acres. The estimated produce of wheat was 100,811 bushels, an average of 20 bushels 28 lbs. to the acre. In 1877, 9481 acres of wheat were sown, the yield being 86,614 bushels, an average per acre of 12 bushels 40½ lbs. The decrease is attributed to the severe drought experienced throughout the country. Stock returns were 133,625 horses, 2,079,979 horned cattle, 7,315,074 sheep, 53,455 pigs.

MINING.—The total yield of gold from all the mines in the colony during 1877 was 373,266 ounces, of the value of £1,306,431. The number of miners was Europeans, 4,634; Chinese, 13,269; total 17,903. The average yield of gold per miner was 20 oz. 17 dwts., the average earnings of each miner £72 19s. 6d. The yield of gold per ton of quartz varied from 16 dwts. 20 grs. on the Ravenswood field to 11 oz. 5 dwts. 23 grs. on the Boyne and Calliope field. (This latter was from 107 tons of quartz only and must be treated as exceptional.) Excluding this and taking the yields from ten fields the average yield of gold per ton of quartz was 1 oz. 11 dwts. 14 grs.

REGISTRATION OF BIRTHS, MARRIAGES, AND DEATHS.

Every birth must be registered within sixty days, and every death within thirty days, next thereafter respectively; and neglect of this regulation renders the parties, whose duty it is to register, liable to a fine not exceeding £10. If sixty days have elapsed from the date of birth, the law requires the parent, or other person making the application to register such birth, to pay a fee of two shillings and sixpence, and to make a solemn declaration of the facts before a Justice of the Peace, prior to the registration. If possible in all cases the father or mother ought to sign as informant. If unable to write, let a mark be made. No Birth can be registered after three years have elapsed from the date thereof.

Every Minister who has celebrated a marriage shall, within one month thereafter, transmit (in accordance with the Act 28 Victoria No. 15) the original certificate to the Registrar of the District, and every Minister who shall fail to transmit the certificate to the District Registrar, shall be liable to a fine of not less than £10 and not exceeding £50. Marriages must be solemnized between the hours of 8 a.m. and 8 p.m. Persons under age must produce the written authority of parents or guardians signed by them in the presence of a Justice of the Peace, Registered Minister or District Registrar or the marriage cannot take place.

In every case of burial, the Minister or officiating person ought to receive from the undertaker or person having charge of the funeral, a certificate from the District Registrar, certifying the registration of the death—unless in the case of inquest, when a certificate from the Coroner or Magistrate holding the inquest will be sufficient; and if any dead body shall be buried without such certificate, the person who may bury the same, or perform any funeral or religious service for the burial, or who shall in any way dispose of the body, shall forthwith give notice of the facts to the District Registrar; and Undertakers are bound under a penalty not exceeding £10 to lodge with the District Registrar, immediately after the burial, a Certificate of such burial signed by themselves, and countersigned by two witnesses.

INSPECTORS OF SLAUGHTER HOUSES.

The Sergeant or Senior Constable in the respective localities is the appointed Inspector of Slaughter Houses, and of Cattle intended for slaughter.

POSTAL AND TELEGRAPHIC INFORMATION.

All Letters, Packets, and Newspapers posted in Queensland that are required to be prepaid, must bear Queensland Postage Stamps.

LETTERS.

Town Letters delivered at the Post Office, or within the limits of the town where posted, not exceeding ½oz.

Every additional ½oz. or part

Country Letters not exceeding ½oz.

Every additional ½oz. or part thereof

Letters or packets containing gold—

Not exceeding ½oz.

Every additional ½oz. or part thereof

Intercolonial letters, that is, to any of the Australian Colonies—

Not exceeding ½oz.

Every additional ½oz. or part

OVERLAND to Victoria and South Australia—

Not exceeding ½oz.

Every additional ½oz. or part thereof

Letters to Great Britain, via Southampton either

Torres Strait or P. & O. route, or via California—

Not exceeding ½oz.

Every additional ½oz. or part

Via Brindisi—

Not exceeding ½oz.

Every additional ½oz. or part

The rates above mentioned for English mail letters, apply to both the Torres Straits and the P. and O. routes. Letters should be marked "via MELBOURNE" if to be sent by the P. & O. route, and "via CALIFORNIA," if to be sent by the Californian mail; otherwise they will be forwarded by the Torres Straits Mail.

The late fee on letters is, Colonial or Intercolonial, 3d.; Foreign, 6d., to be paid by affixing to the letter the necessary postage stamps. Late letters can be posted on board the steamers up to the time of sailing.

Letters, packets, or newspapers can be registered by affixing a fourpenny stamp in addition to the proper postage. The letter must be given to the post official, who will give a receipt for it. The adoption of registration is strongly urged in all cases where money, notes, or packets of value are sent, as the precautions taken with registered letters almost ensure their safe delivery.

TOWN DELIVERIES.—In Brisbane there are three daily at 8.30 a.m. 2 p.m. and 4.45 p.m. In Ipswich two deliveries at 9 a.m. and 3.40 p.m. In Rockhampton one regular delivery at 2.30 p.m., and another at 9 a.m. when steamers with mails arrive before that hour. In Toowoomba two deliveries at 9 a.m. and 2 p.m. In Maryborough one regular delivery at 9 a.m. and one at a later hour when steamers arrive with mails from the south before 2 p.m. In Warwick one delivery at 9 a.m. In Gympie, One Mile Creek, Townsville and Cooktown one delivery.

POST OFFICE HOURS.—The Delivery Office is open from 9 a.m. to 5 p.m. daily, Sundays excepted.

THE DEAD LETTER OFFICE is open from 10 a.m. to 4 p.m., except on Saturdays, when it is closed at 12 o'clock.

THE OFFICE for REGISTRATION OF LETTERS is open from 10 a.m. to 4 p.m.

GENERAL RULES.

Any letter or packet posted for the Colony, the Australian Colonies, and the United Kingdom, will, if a single rate of postage be affixed, be forwarded and charged on delivery, with double the postage deficient; but if any letter or packet does not bear that amount of postage, it will be opened and returned to the sender.

POSTAL INFORMATION—Continued.

Any letter or packet posted for transmission to British Colonies (excepting the Australian Colonies and New Zealand), and to Foreign Countries (a few places excepted), whether sent direct or through the United Kingdom, will invariably be opened and returned to the sender unless it bears the full amount of postage payable thereon.

Letter and packets, on being re-directed, are charged the same amount of postage, in addition to the original postage, as would be payable if such letter or packet were originally posted at the place of re-direction.

A postmaster may refuse to receive or transmit by post any letter, packet, or package of newspapers exceeding sixteen ounces in weight or of inconvenient form or dimensions, or containing, or reasonably suspected to contain, any article likely to injure the other contents of the mail bags or any person.

On General Holidays the Offices are only open from 9 a.m. to 10 a.m., and there is only one delivery by letter carrier.

UNCLAIMED LETTERS.

Letters, packets, and newspapers, if not claimed, are kept at the Post-office to which they are directed for a period of one month. If not claimed at the expiration of that time they are sent to the Dead Letter Office, and the letters are then advertised in the Government Gazette. Queensland letters (that is, letters posted within the colony) if not claimed within one month from the date of such publication, are returned to the writer. Intercolonial letters (that is, letters posted in any of the Australian Colonies or New Zealand), if not claimed within three months from the date of such publication, are returned unopened to the colony from which they were received. British and foreign letters (that is, letters posted in the United Kingdom, or at any place beyond the Australian Colonies), if not claimed within twelve months from the date of such publication, are returned unopened to the Colony or Country from which they were received.

PRIVATE LETTER BOXES.

These may be obtained on the following terms, viz:—

Without lock, £1 1s. per annum, payable half-yearly in advance.

With lock, £1 5s. per annum, payable in advance; and a deposit of 15s. when box is applied for, of which amount 10s. will be returned, when use of box is discontinued, provided the box is in good order and keys (triplicate) are given up complete. If the lock is rendered useless by loss of the keys or by any damage, the whole amount deposited will be forfeited. A new lock and keys will be supplied at any time, if required, on additional payment of 7s. 6d.

PRIVATE BAGS.

Settlers, upon Mail Routes, requiring the accommodation of a private bag, can obtain the same from either of the two Post Offices next to them upon payment (in advance of a sum not exceeding Two Guinea per annum to the Postmaster, who has to make up the bag, subject to the following regulations viz:—

(1) The bag must be of leather, and provided at the cost of the person requiring it. (2) The Postmaster will close and seal securely before despatching it; and it must be returned in like manner, sealed with some seal, the impression of which is known by the Postmaster. (3) The bag may contain letters for all persons who give written authority to the Postmaster to enclose them. The person paying for the private bag is responsible for the postage of all unpaid letters, and for the receipts for all those which may be registered.

NEWSPAPERS.

Newspapers are transmitted within the Colony, and to the neighboring Colonies, free of charge, if posted within seven days from the date of publication; if posted after that period, one penny each. Newspapers received from beyond the Colony, in monthly parts, are (when re-posted) subject to a charge of 1d. for every number contained therein.

Postage on Newspapers to the United Kingdom, 1d.; or, via Brindisi, not exceeding 4 ozs., 2d.; every additional 4 ozs. or fraction, 2d.

Newspapers to be without a cover or in a cover open at both ends, but without enclosure, mark, or communication, other than the words "Newspaper only," the printed name, occupation, and address of the publisher or vendor, in addition to the name, occupation, and address of the person to whom sent, otherwise they will not be transmitted. Newspapers re-posted in the Colony must be prepaid 1d. each.

BOOK AND OTHER PACKETS.

Bankers' packets, containing notes, orders, cheques, pass-books, returns or other periodical statements; process of, or proceedings or pleadings in any Court, briefs, cases, and instructions for counsel, and their opinions thereon respectively, deeds, affidavits, policies of insurance, letters of attorney, depositions, or recognizances, patterns or samples of merchandise, having no intrinsic value, either unenclosed or enclosed in transparent bags, or in bags tied round the neck so as to be easily loosened and re-fastened; prices current and catalogues; vouchers, or returns, or copies of returns, made by or to any officer in the public service; scrip, pamphlets, maps, plans, specifications, music, photographs (on paper), magazines, reviews, placards, almanacs, prospectuses, paintings, engravings, printers' proofs, or periodical publication, other than newspapers; printed or plain books, writing paper and envelopes, seeds (in transparent bags or papers, tied so as to be easily loosened and re-fastened, not exceeding 16 oz. in weight), can be sent through the Post-office at the undermentioned rates:—

For Queensland—				For the United Kingdom, (via Southampton,) and for the Australian Colonies—			
Not exceeding 2 ozs.	..	..	1d.	Not exceeding 1 oz.	..	..	1d.
Above 2 ozs. but under 4 ozs.	..	..	2d.	Not exceeding 2 ozs.	..	..	2d.
Above 4 ozs.	..	..	3d.	Not exceeding 4 ozs.	..	..	4d.
Above 6 ozs.	..	..	4d.	Every additional 4 ozs. or part thereof	..	..	4d.
Every additional 2 ozs. or part thereof..				1d.			

For the United Kingdom via Brindisi, under one ounce 6d.; under two ounces 6d.; four ounces 6d.; and each additional four ounces 6d.

NOTE.—The books or packets must be in covers opened at the end or sides for inspection, have the contents legibly marked, must not exceed 3 lb. in weight nor the dimensions of two feet in length by one foot in width and depth, and must not contain any letter or writing save the address and the name and address of the sender. Packets in which these rules are infringed, or which are posted insufficiently stamped, will be returned to the sender, except in the case of the United Kingdom, where short postage will be charged and also a fine on delivery.

POSTAL INFORMATION—Continued.

MONEY ORDERS.

MONEY ORDERS may be obtained between the hours of 10 a.m. and 3 p.m. (except on Saturdays, when the offices close at 12 o'clock), and made payable at any Money Order Office in the Colony, on payment of the following charges:—

QUEENSLAND.—For any sum not exceeding £2, threepence; above £2 but not exceeding £5, sixpence; above £5 but not exceeding £7, ninepence; above £7 but not exceeding £10, one shilling.

INTERCOLONIAL.—New South Wales, South Australia, Victoria, New Zealand, Tasmania, Western Australia.—For any sum not exceeding £5, one shilling; exceeding £5 and not exceeding £10, two shillings.

No order will be issued for more than £10. Payment of a Money Order must be obtained before the end of the sixth calendar month after that in which it was issued.

Money Orders may be transmitted by Telegraph between all Money Order Offices in Queensland, and between Queensland and any Money Order Office in New South Wales, Victoria, and South Australia having telegraphic communication, on payment of the usual telegraph charge for a message, in addition to the Money Order commission.

ELECTRIC TELEGRAPH.

The Telegraph Stations in Queensland are open to receive messages from 9 a.m. to 6 p.m. daily, Sundays excepted. On Sundays the officers are in attendance at 9 a.m. for the receipt and despatch of telegrams of urgent importance. On special occasions when messages may be received after office hours an additional charge of 50 per cent. on the ordinary charge is made.

Between any two stations in the Colony—

Every additional word	0	9
To stations in West Australia—		
Ten words	4	0
Every additional word	0	4

Press messages are charged one-half the ordinary rates (except to the Colony of New Zealand), and are exempt from the additional charge for transmission after ordinary office hours.

At country post towns, where no electric telegraph station is opened, Postmasters have been appointed receivers of messages, which they will forward for transmission to the nearest electric telegraph station, by first post. Persons desirous of using this means of communication will hand their message to the postmaster, together with the cost of transmission, twopence for postage, and sixpence for the postmaster's fee. Message forms may be obtained on application to any such post-office, and the postmaster and station-master will furnish information as to the cost of transmission.

All messages will be held strictly confidential, should be written in ink, in a legible manner, in plain language, on a proper form, the address must contain all the information necessary to avoid delay and ensure delivery, and must be signed by the sender. Where numbers are stated, words as well as figures must be used.

Payment of all charges in advance will be required, except the following: Replies to interrogatory messages which contain the words "Reply paid." Messages for transmission within the colony of Queensland, or to any of the Australian Colonies and New Zealand marked "Collect," when the sender is known to the officer in charge of the despatching station, and guarantees, in writing, that in the event of the message not being paid for on delivery, it will be paid for on demand by the sender; in all such messages, the word "Collect" must be written by the sender as the last word of the message to be despatched; press messages to be paid for, at receiving station on delivery.

When the sender wishes to pay for a reply, or to have the message repeated or posted, instructions are to be inserted in the address immediately before the name of the terminal station. Messages which are addressed beyond the limits of delivery, can be posted to their destination free of charge.

Messages may be transmitted in cypher in the English language or secret language, but cypher words must not contain more than three syllables, and words in secret language must not average more than five letters; an additional charge of fifty per cent. to be made for messages containing cypher or secret language.

Messages will be delivered free within one mile of the station to which addressed. If beyond that distance according to the instructions contained in the address. Expenses incurred for portage, cab hire, or boat hire, payable by the receiver, will be charged. Messages addressed beyond the limits of delivery, or which do not contain special directions as to transport, may be posted to their address by the terminal telegraph station-master free of charge. The sender or receiver of message, on proving his or her identity may receive certified copies of messages on giving the date and paying a fee of one shilling for each copy. In the event of an interruption to communication by which messages may be unusually delayed, it will be optional with the senders, on application before transmission, to withdraw their messages and receive back the amount paid. If desired, messages of consequence can be repeated from stations at which received to stations at which originally sent, on payment of an additional half-rate; but no responsibility will be undertaken nor any claim for compensation entertained for any errors or mistakes in transmission or delay in delivery of messages.

INTERNATIONAL TELEGRAPH.

By the system of registration of name and address, and the adoption of the word scale of charging, the cost of telegraphing between Brisbane and London and many of the leading cities of India, China,

At the time of going to press the arrangements for the Northern Circuit had not been published.

DIRECTIONS FOR MAKING A WILL.

A CODICIL.

A WILL cannot be made in language too simple or concise; it must be written with ink, and must be signed at the end of each sheet (if there be more than one) by the testator in the presence of two or more witnesses.

The witnesses, who must not be interested in the will, must rigidly comply with every particular required by the attestation clause, at the end of which clause they must sign their names. A witness is not bound to know the contents of the will.

FORM OF A WILL.

This is the last Will and Testament of me
 made this day of One thousand
 eight hundred and as follows. I give, devise,
 and bequeath all my messuages, land, tenements,
 and hereditaments, and all my household furniture,
 ready money, money secured by life assurance,
 goods and chattels, and all other my real and
 personal estate and effects whatsoever, unto my
 dear wife [or other person, as may be]

her heirs, executors, administrators, and
 assigns, to and for her and their own absolute use
 and benefit, according to the nature and quality
 thereof respectively, subject only to the payment
 of my just debts, funeral and testamentary expenses
 and the charges of proving and registering this my
 will. And I appoint my said wife executor of this
 my Will, and hereby revoke all other wills.

In witness whereof I have hereunto set my hand
 the day and year above written.

Signed published and acknowledged by the
 said as and for his last Will and
 Testament in the presence of us, who in his
 presence and at his request, and in the presence
 of each other, have subscribed our
 names as witnesses.

H

To a will is to be made with the same regulations
 as the will itself, and may be written thus—This
 is a codicil to my last Will and Testament, bearing
 date the day of 187
 and which I direct to be taken as part thereof. I
 give, devise, and bequeath, &c. As witness my
 hand this day of 187

NOTE.—Obliterations and alterations of any sort
 in a will ought, if possible, to be avoided; when of
 necessity made, they must be signed by the Testa-
 tor and Witnesses on the margin, or as near to the
 alteration as possible.

Marriage after making a Will renders the Will
 void.

If a Witness is interested in the Will the claim to
 such interest becomes forfeited.

If a person wishes to dispose of all his property
 in one gift, the words "all my real and personal
 estate" may be used.

Personal Property left without a Will is
 devisable as under:—If the deceased should leave
 Children and no Widow, the whole property is to
 be divided equally among the Children. If he
 leave a Widow and Child or Children, the former is
 entitled to one-third, and the latter to the remain-
 ing two-thirds. If he leave a Widow and no Child,
 the former is entitled to half, and the next of Kin
 to the remainder as follows:—A Father, the whole
 amount. If no Father; a Mother, Brothers or
 Sisters, or their issue, equal portions. If
 none, Uncles, Aunts, Nephews and Nieces, equal
 portions.

SEED PLANTING.

The approximate time required for seeds to germinate at a temperature of about 60 deg. is as follows:—Garden cress 2 days; spinach 3 days; cabbage, turnips and lettuce 4 days; endive, melons, cucumbers and mustard 5 days; radish, horseradish, onions and leeks 6 days; barley, maize, cauliflower, beans and beet, 7 days; wheat, thyme, marjoram, French beans, 8 days; peas, 9 days; vetches and tobacco, 10 days; tomatoes, carrots, stocks, celery, and clover, 15 days; sago and pepper, 20 days; potatoes, parsnips, and parsley, 21 days.

Much depends on the weather, the time of sowing, and the depth at which sown as to the period when the shoots should make their appearance.

Quantity of seed necessary to sow an acre:—

Wheat and barley, 2 to 3 bushels; oats, 2 to 4 bushels; rye, 2½ bushels; ryegrass, 1 bushel; clover, 10 to 12 lbs.; trifolium incarnatum, 24 lbs.; lucerne, 20 lbs.; carrots, 8 to 12 lbs.; mangold-wurtzel, 5 to 8 lbs.; turnips, 2 to 3 lbs.

Quantities of seeds wanted to sow rows of stated lengths or plots of garden ground:—

Asparagus bed 15 square yards, ½ pt.; beans, broad, per row of 80 feet, 1 qt.; beet, row of 50 feet, 1 oz.; broccoli, per 4 square yards, ½ oz.; brussels sprouts, per 4 square yards, ½ oz.; cabbage, bed of 8 square yards, ½ oz.; carrots, drill of 120 feet, 1 oz.; carrots, bed of 12 square yards, 1 oz.; cauliflower, 4 square yards, ½ oz.; celery, 4 square yards, ½ oz.; cress, 3 square yards, 1 oz.; endive, 4 square yards, ½ oz.; kale, 4 square yards, ½ oz.; kidney beans, row of 80 feet, ½ pt.; leek, 2 square yards, ½ oz.; lettuce, 4 square yards, ½ oz.; onions, 9 square yards, 1 oz.; parsley, row of 80 feet, 1 oz.; parsnip, drill of 200 feet, 1 oz.; peas, row of 60 feet, 1 pt.; radishes, 4 square yards, 1 oz.; savoy, 4 square yards, ½ oz.; spinach, 10 square yards, 1 oz.; spinach, drill of 120 feet, 1 oz.; turnip, 4 square yards, ½ oz.

Number required of trees or plants for an acre according to the distance are:—1 foot apart, 43,560; 1½ feet apart, 19,360; 2 feet apart, 10,890; 2½ feet apart, 6,960; 3 feet apart, 4,840; 3½ feet apart, 3,556; 4 feet apart, 2,722; 4½ feet apart, 2,151; 5 feet apart, 1,742; 5½ feet apart, 1,440; 6 feet apart, 1,200; 6½ feet apart, 1,030; 7 feet apart, 880; 7½ feet apart, 775; 8 feet apart, 680; 8½ feet apart, 602; 9 feet apart, 538; 9½ feet apart, 482; 10 feet apart, 436; 10½ feet apart, 361; 12 feet apart, 302; 13 feet apart, 258.

LAND MEASUREMENT.

An acre of land contains 4 roods or 10 square chains or 160 rods or 4,840 yards or 100,000 links. A chain consists of 100 links or 22 yards or 66 feet. The following various measurements show what constitutes an acre, and will enable anyone to form an approximate estimate of the area of land.

5 yards wide by 968 yards long—10 yards wide by 484 yards long—20 yards wide by 242 yards long—40 yards wide by 121 yards long—70 yards

NOTES FOR THE FARMER AND GARDENER—Continued.

wide by 68 1-9th yards long—80 yards wide by 60½ yards long—60 feet wide by 726 feet long—126 feet wide by 363 feet long—220 feet wide by 198 feet long—240 feet wide by 181½ feet long—440 feet wide by 99 feet long.

LAND OR SUPERFICIAL MEASURE.

144 square inches	1 square foot
9 square feet	1 square yard
272½ feet or 30½ yards	1 rod, pole, or perch.
40 rods, poles or perches	1 rood
16 poles	1 chain
4 rods or 10 chains	1 acre
640 acres	make 1 square mile (a section of land).

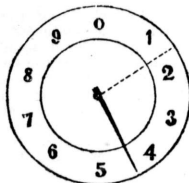

Land is measured by Gunter's chain, which is as follows :—

LENGTH.—7.92 inches one link, 12 inches or 1.515 links one foot, 36 inches or 4.545 links one yard, 198 inches or 25 links one pole, 702 inches or 100 links or 66 feet or 22 yards one chain, 7,920 inches or 1,000 links or 10 chains one furlong, 63,360 inches or 8,000 links or 80 chains one mile.

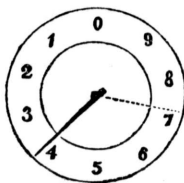

SQUARE.—62,726 inches make one square link, 2,295 square links one square foot, 22,661 square links one square yard; 625 square links one square pole; 10,000 square links one square chain; 25,000 square links or 2.5 square chains one square rod; 100,000 square links or 10 square chains make one square mile.

DIRECTIONS FOR READING AND REGULATING GAS METERS.

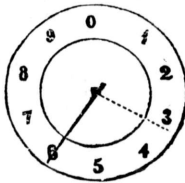

The underneath woodcut represents the Dial Face or Index of a Gas Meter.

Tens of Thousands.

Thousands.

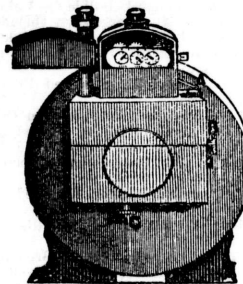

Hundreds.

On the RIGHT HAND Dial of the Index each figure is 100, 200 up to 1000 Cubic feet; on the Middle Dial the figures start from 1000 up to 10,000; on the Left hand Dial the figures start from 10,000 up to 100,000. The hand on each Dial face moves round in the same direction as the figures count. Now to read the Meter as shown by the disposition of the hands as above:—Begin at the left hand Dial (always read from left to right), the hand has just passed 4, set down 4; on the middle Dial the hand has passed 3, set down 3, on the Right hand Dial the hand is at six, set down 6; and you have the three figures 436 to which must be added two cyphers to represent the hundreds, making 43,600 feet registered.—To ascertain the quantity of gas used in a given time deduct the previous register shown by the dotted lines which by the same method would be 17,300, thus—

Register by above Index		43,600	feet
Previous register, as indicated by dotted lines		17,300	
		26,300	feet consumed.

If the hand of any one of the Dials appears to be exactly on one of the figures, refer to the hand of the next face to the right of it, and this will show if the other hand has reached the figure in doubt or not, the same as the hands of a watch. If the hand on the face to the right has completed its revolution it implies that the other has reached the figure; if it has not completed its revolution, then the other hand has not reached the figure—this must be carefully observed to prevent mistake.

WET METER.

A bad, defective or jumping light is due either to water in the pipes or a deficient supply of water in the meter; the former is owing to the condensation of the gas in the pipes and can most easily be provided against by having a stopcock fixed in the lowest bend of the lead piping—say in the kitchen or cellar as the case may be. In the event of the Meter requiring water (all wet meters do require a periodical supply of water), the want can be easily be supplied by attending to the following directions.—Turn off the gas at the Main, then unscrew the small brass plug at the bottom of the meter, allowing any condensed vapour that may collect in the inlet pipe to escape; then unscrew the side plug and if the water does not flow out of the aperture, unscrew the top plug pouring in water until it flows from the side—after allowing the surplus water to flow off, screw the plugs in tightly with the fingers.

Dry Meters are infinitely less trouble than Wet ones, but nearly all Gas Companies have a rooted objection to supplying them (it has been said that they do not register so freely as Wet Meters). They seldom get out of order, but when they do the services of a competent gas fitter are necessary.—He will disconnect the meter and relieve it of any water which may have condensed in it.

A leakage in the pipes may be discovered by noting the register on the Dial say on Saturday night and again on Monday, or any other time when some hours elapse between the gas being used. Any difference of Register will show that an escape of gas is taking place.

USEFUL HINTS.—In the event of an escape of gas, open doors and windows and promptly turn off the gas at the Main.—A little white lead or even soap will temporarily stop a leak.—NEVER LOOK FOR A LEAK WITH A LIGHTED CANDLE.—Where the gas is turned off at night the taps of the burners should be turned before the gas is shut off at the meter.—Where gasaliers or chandeliers are in use the evaporation of the water can be considerably retarded by a small quantity of oil being poured on the water in the hydraulic tube.

MAY & DAHL,

SURGICAL INSTRUMENT MAKERS

AND

CUTLERS OF BRISBANE

In announcing their removal to larger premises in Roma Street, would beg to call attention to the various branches of their business which embrace, 1st—The Manufacture of all kinds of

SURGICAL INSTRUMENTS.

including Artificial Legs, Arms, Hands, Crutches, &c. We also make Instruments for every kind of deformity, or deficiency of the human frame. We are particularly careful in the manufacture of our Trusses, which are generally acknowledged to be very comfortable and are always made to suit each particular case. We will send directions for measurement for any of the above on application.

2nd—The manufacture of all kinds of

CUTLERY.

In this department we do not profess to enter into competition with the imported goods, but are prepared to execute any orders for specialities in this line, or for articles not procurable here, and can in all cases guarantee them of the best quality.

3rd—We undertake the repairing and adjusting of every variety of

SEWING MACHINES.

Each Machine sent to us for repairs is carefully examined, is put in a state of thorough repair, is adjusted to a nicety and well tested before being sent away, so that we can always guarantee them to be in good working order.

We would call special attention to the new

CANADIAN SEWING MACHINES

which we have very great pleasure in introducing into Queensland, as they combine all the qualities of a really first-class Sewing Machine with extreme cheapness. To say that they are manufactured in Canada is alone a sufficient guarantee of their excellence, as all who have experience of Canadian goods can testify. We also trust from our long experience with every variety of Sewing Machines, our strong recommendation of the Canadian may be an additional guarantee.

We would enumerate the following among other advantages possessed by this Machine:—1. Extra size and room under the arm. 2. Simplicity—Direct action. 3. Ease of operation. 4. Perfection of mechanism—No gear wheels. 5. Superior style of shuttle and large bobbins. 6. The most perfect "Take up." 7. Cannot be put out of time or adjustment by use. 8. Great range of work. 9. Durability of working parts. 10. Unequalled tensions.

This machine is unique in this particular, that by a simple but efficient contrivance the tension in the shuttle can be regulated without taking the shuttle out of its place. It also possesses the advantage claimed by few machines, of being able to wind the bobbins without putting the machine in motion, thereby saving an immense amount of wear and tear of the machine.

Each Machine is supplied with full set of accessories.

The prices are as follow:—Osborne A, with polished table £7 15s. 0d.; Ditto, with handsome cover £8 5s. 0d.; Ditto, with extra leaf and set of three drawers £9 5s. 0d.; Osborne B, hand machine (shuttle) £3 15s. 0d.

As we receive the Machines direct from the Manufacturers (The Guelph Sewing Machine Company, Canada), we are supplied with all extras and parts connected with the Machines.

IMMIGRATION ACT OF 1872.

REMITTANCE PASSENGERS.

BRITISH.

PERSONS resident in Queensland, wishing to obtain Passages to the Colony for their Friends or Relatives in the United Kingdom, can do so under the provisions of the Immigration Act of 1872, by paying to the Immigration Agent in Brisbane, or to any of the Clerks of Petty Sessions in the Colony, amounts in accordance with the following scale :—

Males and Females between 1 and 12, each	£1
Males between 12 and 40, each	 2
Females between 12 and 40, each	 1
Males and Females above 40	 4
Infants under 12 months	 FREE.

FOREIGN.

Persons resident in Queensland, wishing to obtain Passages to the Colony for their Friends or Relatives, from the Continent of Europe, can obtain Free Passage Tickets, available for any Queensland immigrant ship leaving London or other British port, on application to this Office, or to any Clerk of Petty Sessions throughout the Colony.

Applicants must clearly understand that these Tickets do not include the Passage from the Continent to the port of embarkation in Great Britain, the entire cost of which must be defrayed by the Immigrant himself.

**ANNUAL SUBSCRIPTION 6s. 6d.—ALL BOOKSELLERS.**

---

**THE WESTERN STAR**

**I**S now published twice a week, and is issued on

**TUESDAYS AND SATURDAYS.**

These days are chosen in order to suit the Mails; when the Railway Line is opened to Dulacca, the dates of departure for the Up Country Mails will probably be altered, and we shall then, we hope, be able to publish on more convenient days.

The Subscriptions per annum will be £1 8s., being only one shilling per quarter higher than for the weekly issue; per quarter, 7s. 6d., payable, in both cases, in advance. The *Star*, having a very large circulation throughout the Western districts, is one of the best advertising mediums in the colony. Liberal discount allowed on standing advertisements.

# COOKTOWN COURIER.

THE first established Newspaper in the Cook District is published, in Cooktown every Wednesday and Saturday morning.

The *Cooktown Courier* circulates generally among the Miners and Settlers on the Palmer, Hodgkinson, Normanby, Coen, Etheridge, Cloncurry, Charters Towers, Milchester, Rochford, and Ravenswood Goldfields; also in the Pastoral Districts of North and South Kennedy, Burke, and Cook, and at Port Moresby, New Guinea.

The *Cooktown Courier* contains the latest telegraphic intelligence from all localities, as well as reliable Mining News from the various goldfields and inland districts.

It offers to advertisers the especial advantages of bringing their announcements under the immediate notice of miners and settlers throughout the northern districts of Queensland, whilst it also possesses a large local circulation.

A liberal discount is allowed to Advertisers for standing advertisements.

F. C. HODEL, Proprietor.

**New South Wales Advertiser.**

**AN ILLUSTRATED WEEKLY BUDGET**

OF

**LITERATURE, AGRICULTURE, SCIENCE, MINING, SPORTING  
NEWS AND GENERAL INFORMATION.**

THE SYDNEY MAIL HAS BEEN EXTENSIVELY REMODELLED AND IS  
ACKNOWLEDGED

**THE BEST FAMILY NEWSPAPER IN AUSTRALIA.**

**A**USTRALIAN LADIES—A full page of READING for LADIES is given in every issue of the *Sydney Mail*. The scope of the articles is not circumscribed by the conception, frequently apparent in the "Ladies' column" of newspapers, that only Fashions and Frivolities have interest for women. Essays worthy of the perusal of intellectual women and calculated to expand the ideas of all Ladies of sense and intelligence are a leading feature, and are written almost invariably, by Australian authoresses. In lieu of the second-hand English and American recipes, &c., so frequently republished, original household hints, and recipes by Australian ladies and housewives are supplied, being principally contributed by lady subscribers to the *Mail*, who are thus enabled to exchange practical ideas, with great advantage. Extracts of Items of News or of valuable ideas bearing upon feminine occupations and requirements are sought from every source, far and wide while the lighter topics of Fashion, Society, &c. receive particular attention—special Lady Correspondents supplying from London, letters devoted to chit-chat and to the Fashions, which latter are handsomely illustrated.

**T**HE ILLUSTRATIONS in the *Sydney Mail* are designed by the best Artists in N.S. Wales and executed by the best available engravers. They represent all current events capable of pictorial treatment, and are a special attraction.

**L**ITERARY MATTERS are especially attended to in the *Sydney Mail*. Original contributions by the best Australian writers are constantly

appearing in its columns, and from all sources a plentiful selection of the most curious and interesting extracts is chosen and published in each week's issue.

**C**HILDREN will find a page all to themselves. Pretty little original stories inculcating useful lessons, without being in the least degree formal or dull; Little Jokes for youngsters, and Evening Pastime of Riddles, Enigmas, &c. have made the *Sydney Mail* a great favorite with young people.

**R**EADERS IN THE COUNTRY DESIRING a newspaper for general news, information, and amusement, will do well to subscribe to the *Sydney Mail*. It is the most useful Family Paper published in the colonies.

**F**ARM NOTES FOR THE MONTH, PASTORAL and agricultural notes, the weather, agriculture, pasture, and condition of stock, news from the provinces, produce, cultivation, &c., occupy several pages of the *Sydney Mail*, and so make it a paper for all interested in agricultural and pastoral pursuits.

**T**HE LATEST EUROPEAN AND INTERCOLONIAL TELEGRAMS are given in the *Sydney Mail*.

**T**HE NEWS OF THE WORLD is especially and exhaustively collated for publication in the *Sydney Mail*, which gives its own assortment of news, and is not as many weekly papers are, a mere reprint of a daily journal.

The *Sydney Mail* is so arranged as to be not a merely local publication, but **A FAMILY JOURNAL FOR ALL THE COLONIES.**

In addition to the Illustrations in the body of the paper—**NOBLE ART SUPPLEMENTS ARE ISSUED PERIODICALLY.**

**THE SERIAL STORIES ARE BY THE BEST AUSTRALIAN TALENT**—the proprietors having recently awarded £100 for the best tale submitted in competition for the *Mail*; **AND BY STERLING ENGLISH AUTHORS.**

Subscription to the *Sydney Mail*; 6s. 6d. per quarter, 13s. per half-year, or 26s. per annum.
